Landing Table System

LT-4 (Xpress-peditor)

The "Xpress-peditor" LT-4 Landing Table System is a versatile, multi-functional kitchen support asset that fulfills many needs in a busy food service kitchen setting.

- Portable dumping station - easily delivers product directly from fryers into serving pans. Large funnel design reduces possibility of spillage & waste.
- Use as a First In-First Out rotation system for your products at point-of-sale, ensuring oldest items are consumed first.
- Place a sheet pan over the funnel to create an extra work surface. Or, a cutting board in the pan to use for food prep work. Drippings & scraps are contained in the pan for easy disposal.
- Place sheet pans in the lower racks to provide capacity for transporting service pans, or soiled pans & utensils. The rack panels have hooks for hanging utensils within easy to reach storage.
- Can eliminate need for additional "task-specific" kitchen assets, saving space in the kitchen.
- Swivel casters provide easy 4-way maneuverability and locking wheel brakes create a stable work table.
- Durable stainless steel construction. Racks & funnel are easily disassembled without tools for quick clean-up.

Design Features

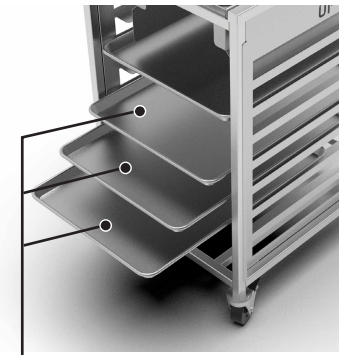

Place full-size pan inside the funnel or beneath. Dump cooked product directly into service pan.

Place a sheet pan & cutting board on top for use as a food prep table, utility cart or extra counter space. Drippings & scrap will be contained in the pan.

First-In-First-Out Rotation
Place pan of fresh food under funnel, transport to point-of-sale. Dump older, unsold food into funnel on top of fresh. Place pan out for serving. Oldest product will be "first out".

Use lower racks to transport fresh items to point-of-sale and to return soiled items to the kitchen.
