Portable Waste Oil Caddy

Model GOC

The **GILES Waste Oil Caddy** provides food service operators a convenient means to safely remove used cooking oil from fryers and then move it to a designated disposal/recycle site.

- Capacity to hold approximately **80 lbs** of waste oil ... approx. (2) mid-size fryers.
- Manually operated rotary pump ... no hassle with power cords & electrical outlets.
- Pump operates in either direction ... one direction discharges oil from tank ... turning the opposite direction can provide suction at the wand, if needed.
- Durable stainless steel construction ... welded tank.
- Large 8" wheels makes maneuvering & handling easy, even when full.

Portable and efficient ... save time & money. The perfect solution to handling your waste cooking oil.

Design Features:

Equipped with a sight glass which provides an easy-to-see indication when the oil level is approaching full ... helps preventing over-filling & spillage.

Capacity:

Volume to hold waste oil from two (2) medium size fryers (approx. 80 lbs).

Hinged Lid w/Latch:

Holes in lid are trimmed with rubber grommets to provide a receptacle for the fryer's discharge hose wand while pumping waste oil into tank.

Holds the hose wand after pumping is complete so that it drains into tank rather than dripped onto the floor.
